Perfectly Primed

Soft-Focus Primer

Description:

Perfectly Primed is a soft-focus primer that applies easily with a soft sensorial. It offers extended wear, while ensuring a perfectly smooth canvas for additional makeup. The ultra-low viscosity **Silwax® A08-UP** provides a lubricious skin feel, and also contributes to the observed velvety finish. **Silwax® D226** is soft silicone wax that reduces syneresis, modifies the melt point of pigmented products and provides an elegant feel. **Silmer® UR-5050** is a unique silicone-urethane resin that promotes extended wear, while maintaining soft and smooth flexibility. **Silmer® G162-F5** is a dimethicone crosspolymer diluted in a low viscosity dimethicone that offers cushion as well as longer playtime on the skin, resulting in improved spreadability. This silicone elastomer gel is ideal for helping to fill in skin pores to prep the canvas for additional layers. Perfectly Primed utilizes specialty Siltech ingredients designed specifically to provide you with that desired blurred and soft-focus look that is your perfectly primed canvas!

Ingredients:

Phase	Ingredients	INCI name	Weight %
A	Jarcane 12 (Jarchem)	n-dodecane	18.00
	Silwax A08-UP (Siltech)	Caprylyl Methicone	3.00
	Silwax D226 (Siltech)	Ceretyl Dimethicone	1.20
	Silmer UR-5050 (Siltech)	Bis Hydroxypropyl Dimethicone/SMDI Copolymer	1.00
B	Aerosil 200 (Evonik)	Hydrated Fumed Silica	0.10
C	Silmer G-162-F5 (Siltech)	Dimethicone (and) Dimethicone/Vinyl Dimethicone Crosspolymer	76.70
Total			100.00

Procedure:

- 1) Combine ingredients in Phase A and heat up to 60°C, or until the wax is melted. Once thoroughly mixed cool down to room temperature.
- 2) Slowly add the ingredients in phase B while mixing at high speed.
- 3) Add the ingredients in Part C and mix vigorously until obtaining a homogeneous gel.
